ELSEVIER

Volume 206, Numbers 1–2, May 1997

WEAR

Contents

Sintered iron-based antifriction materials with added β-SiC 1
M. Chandrasekaran, P. Singh

High resolution transmission electron microscopy observation of the MoS_2–Au interface formed due to stick–slip of MoS_2 sliding on Au in relation to the friction trace 8
N. Takahashi, S. Kashiwaya

Effect of temperature, substrate type, additive and humidity on the boundary lubrication in a linear perfluoropolyalkylether fluid 15
B. Çavdar

Effect of grain size on wear behaviour of alumina cutting tools 24
G.K.L. Goh, L.C. Lim, M. Rahman, S.C. Lim

Effect of sliding speed on wear behaviour of A356 Al-30 wt.% SiC_p MMC 33
A. Ravikiran, M.K. Surappa

Characterization of surface topography of wear particles by SEM stereoscopy 39
P. Podsiadlo, G.W. Stachowiak

Determination of temperatures for sliding contact with applications for braking systems 53
A. Yevtushenko, E. Ivanyk

Tribological characteristics of short glass fibre reinforced polycarbonate composites 60
K.-C. Ho, M.-C. Jeng

Characterisation of surface abrasivity and its relation to two-body abrasive wear 69
M.G. Hamblin, G.W. Stachowiak

Tribological characteristics of Si_3N_4 ceramic sliding on stainless steel 76
X. Zhao, J. Liu, B. Zhu, H. Miao, Z. Luo

Wear resistance of laser processed Al–Si–graphite$_p$ composites 83
Y.B. Liu, J.D. Hu, Z.Y. Cao, P.K. Rohatgi

Investigation on the components and the formation of a tribochemical film in the Si_3N_4–gray iron sliding pair lubricated with distilled water 87
Y.-M. Gao, L. Fang, J.-Y. Su, Z.-G. Xie

The effect of controlled surface topographical features on the unlubricated transfer and wear of PEEK 94
S. Ramachandra, T.C. Ovaert

An expedient approach to the non-newtonian thermal EHL in heavily loaded point contacts 100
M.-T. Ma

An efficient and accurate calculation of traction in elastohydrodynamic contacts 113
R. Dama, L. Chang

Effects of journal misalignment on the performance characteristics of three-lobe bearings 122
P. Arumugam, S. Swarnamani, B.S. Prabhu

Particle behavior in two-phased lubrication 130
A. Kumar, S.R. Schmid, W.R.D. Wilson

Modeling friction and wear phenomena 136
S.L. Rice, F.A. Moslehy

Enhanced model of a plowing asperity 147
A. Azarkhin, M.L. Devenpeck

Elsevier Science S.A.

Formation and evolution of a subsurface layer in a metalworking process 156
M. Fishkis, J.C. Lin

Effects of couple stresses on the lubrication of finite journal bearings 171
J.-R. Lin

Investigation of the anti-wear characteristics of palm oil methyl ester using a four-ball tribometer test 179
H.H. Masjuki, M.A. Maleque

Formation and characterization of self-lubricating MoS_2 precursor films on anodized aluminium 187
P. Skeldon, H.W. Wang, G.E. Thompson

Prediction of the fatigue behaviour of physically vapour deposited coatings in the ball-on-rod rolling contact fatigue test, using an elastic–plastic finite elements method simulation 197
K.-D. Bouzakis, N. Vidakis

Experiments of scoring and the calculation of scoring on gears by heat method 204
T. Tevruz

Characteristic features of alloying HSS-based deformed compound powder materials with consideration for tool self-organization at cutting
1. Characteristic features of wear in HSS-based deformed compound powder materials at cutting 214
G.S. Fox-Rabinovich, A.I. Kovalev, L.Sh. Shuster, Yu.F. Bokiy, G.K. Dosbayeva, D.L. Wainstein, V.P. Mishina

Tear-off wear mechanism of sintered diamond tool in cutting SiC-particle-strengthened epoxy composites 221
J.E.D. Afaghani, K. Yamaguchi, T. Nakamoto, K. Yoshino

Lubrication with emulsion: first report, the extended Reynolds equation 230
S. Yan, S. Kuroda

Lubrication with emulsion
II. The viscosity coefficients of emulsions 238
S. Yan, S. Kuroda

Non-linear behavior of a flexible shaft partly supported by a squeeze film damper 244
O. Bonneau, J. Frêne
